

RCI RC 4500 TLE Upload procedure

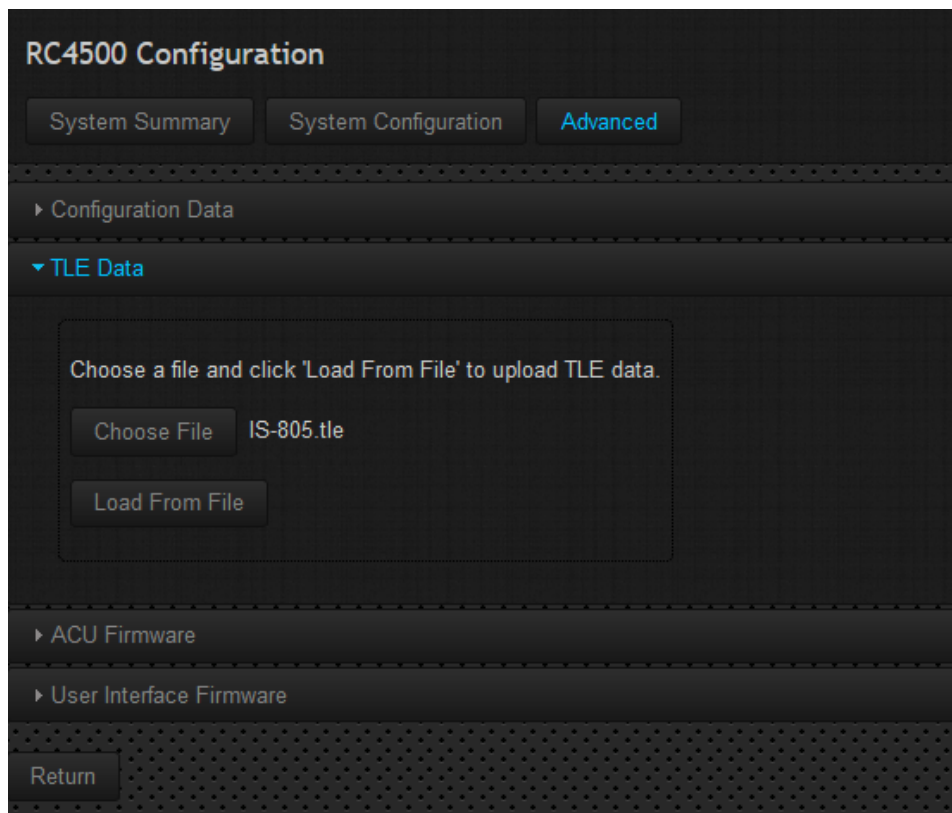

1. Locate the TLE file that includes your satellite(s)
e.g. <https://www.celestrak.com/NORAD/elements/>
2. Ensure there is a Carriage Return Line Feed at the end of the last line of the TLE file.

In Windows, Notepad++ may be used to display the CR LF Characters in the file.

Note if there is no CRLF at the end of the file, the last satellite in the list will not be processed. Notepad ++ can be used to confirm.

3. Go to the RCI web interface -> Configuration -> Advanced -> TLE Data

4. Select "Choose File" and select the TLE file.
5. Press "Load From File" The file will be processed.
6. The upload will be confirmed. If the file contains 1 satellites of the 3 configured in the RCI, the confirmation message will be "Upload complete... 1 of 3 items updated" as pictured below.
